Green brief election manifesto

BÜNDNIS 90 / DIE GRÜNEN  
Schleswig-Holstein

# English

## Let's vote Green!

Monika Heinold and Aminata Touré are our top green duo for the state parliamentary elections on 8 May 2022. Together, we stand for a green future in Schleswig-Holstein. For us, the "we" takes centre stage.

**Monika Heinold** stands for politics with vision along with stability for the whole of Schleswig-Holstein. In two coalitions, she was and is Finance Minister and Deputy Minister President, a doer and team player through and through.

**Aminata Touré** has been a state parliament member since 2017. Since 2019, she has been the youngest and first Afro-German vice-president of a state parliament. She stands for politics that engage and inspire people.

We make climate protection a top priority and put justice at the heart of our policies. Together, we will make our democracy come alive, seize the opportunities digitalisation offers and make Schleswig-Holstein an economic wonderland of climate protection.

Together with Monika Heinold and Aminata Touré for Town. Country. Schleswig-Holstein.

## I. For climate protection as a top priority

With Monika Heinold as Minister President, we will put Schleswig-Holstein on the 1.5 °C pathway and become **climate neutral by 2035**. We are significantly expanding **renewables**, becoming an innovation region for **green hydrogen**, and protecting **biodiversity**.

With the expansion and networking of bus and rail transport, our public transport ticket for pupils and trainees and huge investments in cycling infrastructure, we'll get everyone in the towns and country side from A to B in a green, reliable and affordable way.

## II. Schleswig-Holstein, a digital climate protection economic wonderland

The firms in our state secure our **prosperity** and good jobs. Our future-oriented economic development helps them on their way towards climate neutrality and with digitalisation. This way, we are making Schleswig-Holstein even more attractive as a **business location** and encouraging company relocations, start-ups and innovations.

We support our **tradespeople** as they are key pillars who can help us carry out climate protection measures. We foster young talent through training and a variety of career paths.

## III. For more educational equity

We support children and families. Every child in Schleswig-Holstein should grow up **well protected** and have the best prospects of shaping their own future. We will create **more day care places** and specialist staff, further improve the **quality of day care** and ensure **more flexible care** in the mornings and evenings. Also, we aim to make day care centres **more inclusive**.

We give young people a boost and ensure **more educational equity**. We are increasing **digital technology** in schools and we will design **all-day activities** in such a way that children and teenagers can also take advantage of educational and recreational opportunities in the afternoons and develop in a variety of ways.

## IV. For species protection and healthy, fair agriculture

Biodiversity and a sound environment are fundamental for all our lives. We are expanding **protected areas** on land and at sea, reducing pesticide use and further developing our **biodiversity strategy**.

Farmers provide good and healthy food every day. We will help them achieve our goal of **30% organic farming** in Schleswig-Holstein. At the same time, we will stand up for **fair prices** for farmers and for **more animal welfare**.

## V. For a just, liberal and diverse society

**Justice, freedom and diversity** make our society strong! Everyone living in Schleswig-Holstein should be heard and represented even more strongly in state politics – be it through taking part in citizens' councils or opening up voting rights to people who live in Schleswig-Holstein permanently. We advocate for the greater **representation** of social groups that have been too invisible to date.

We want everyone in our state to be able to **live safely** and **develop freely**. We will reinforce the prevention and **protection against gender-based violence** and stand resolutely **against the right**.

## VI. For our life in Schleswig-Holstein

Whether it's rented or owned, urban or rural, housing must not become a luxury. We will provide **affordable** and **sustainable housing**, protect tenants from excessive rent increases, **preserve housing stock** and promote **social housing**.

We will ensure good **health care in urban and rural areas**. Health must be accessible to all. Our top priority is the well-being of patients rather than the maximisation of profit.

## Let's vote Green! With both votes on 8 May.
